LinkedIn: <https://linkedin.com/in/mohnish-kumar-s-589988209>

Specializations: PHP, Laravel, MySQL

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience in designing, developing, and maintaining scalable web applications, e-commerce platforms, and business management systems. Experienced in PHP, Laravel, CodeIgniter, JavaScript, Next.js, MySQL, REST APIs, and AWS services. Skilled in building end-to-end solutions, integrating third-party services, optimizing application performance, and delivering production-ready applications.

CORE TECHNICAL SKILLS

Backend

- PHP
- Laravel
- CodeIgniter
- REST API Development

Frontend

- HTML, CSS, Bootstrap
- JavaScript, jQuery

Databases

- MySQL
- Query optimization

Cloud & Tools

- AWS S3
- Git & GitHub
- Postman
- Cron Jobs
- Linux Server Management

EDUCATION

Bachelor of Engineering – Mechanical Engineering

SRM Valliammai Engineering College , 2020

CERTIFICATIONS

JavaScript Algorithms And Data Structures – **FreeCodeCamp**

KEY IMPACT & OWNERSHIP

- Improved application performance by optimizing REST APIs and MySQL queries, reducing page response times by up to 40%.
- Automated generation of product descriptions and SEO metadata using OpenRouter AI APIs, reducing manual content creation effort.
- Successfully managed and delivered 3 concurrent client projects while meeting feature delivery and production support deadlines.
- Developed scalable marketplace, CMS, and admin dashboard features for business operations.

CAREER TIMELINE

Betamonks Technology Factory | Full Stack Developer | Mar 2025 – Present

- Develop and maintain large-scale marketplace and business management applications using CodeIgniter, Next.js, JavaScript, and MySQL.
- Optimized website performance through image compression, database tuning, and asset minification, improving GTmetrix scores and reducing page load times by 35%.
- Lead the migration of legacy CodeIgniter applications to Laravel 12, implementing MVC architecture, Eloquent ORM, and database optimization to enhance maintainability, scalability, performance, and overall system architecture.
- Developed 20+ business features including workflow automation, sales reporting, and dashboard enhancements, improving operational efficiency across multiple departments.

Pupa Clic Technologies | Junior Solution Engineer | Sep 2024 – Feb 2025

- Developed and maintained responsive client websites and web applications.
- Implemented new features and enhancements based on business requirements.
- Resolved bugs and optimized application performance and usability.
- Managed multiple projects simultaneously while handling client requirements and feature implementations.

eWallHost Web Services | PHP Developer | Jan 2023 – Aug 2024

- Developed and maintained web applications, CMS modules, and custom business solutions using PHP, JavaScript, AJAX, and MySQL.
- Integrated third-party APIs and optimized server-side functionality.
- Managed product and service integration within the CMS dashboard and maintained content updates efficiently.
- Optimized website performance and Implemented on-page SEO improvements to enhance search engine visibility and organic traffic performance.

KEY PROJECTS HANDLED

Yuukke Marketplace – Handmade Indian Products, Gifts & Home Essentials

- Designed and implemented multiple offers, Sales, and reporting modules while enhancing the admin dashboard for improved workflow management.
- Optimized MySQL queries and **REST APIs** to improve application performance and ensure seamless integration with the Next.js frontend.
- Integrated **Cashfree Payment** Gateway and implemented **Razorpay webhook** functionality for secure payment processing and automated transaction handling.
- Contributed to the **CodeIgniter to Laravel 12** migration, supporting end-to-end development, testing, and deployment workflows.
- Developed custom **WordPress** dynamic event pages with database-driven content rendering and event management functionality.
- Implemented On-Page and Off-Page SEO optimizations to enhance SERP visibility and improve organic traffic growth

Pothys – Online Shopping Platform

- Developed and enhanced **CRM dashboard** features based on business requirements, improving operational efficiency and user workflows.
- Performed manual testing, identified and resolved bugs, and supported production deployments to ensure application stability and reliability.
- Managed large-scale product image storage using **AWS S3**, maintaining image references in MySQL and optimizing media handling for high-volume e-commerce operations.

EwallHost – Web Hosting & Digital Solutions Platform

- Redesigned and maintained website UI/UX, developing new product and service pages with API integrations to enhance functionality and user experience.
- Managed and customized the **CMS platform**, including content management, page creation, and on-page **SEO optimization** to improve search engine visibility.
- Optimized frontend performance using **Gulp.js**, asset minification, and the **Smarty Template Engine**, enabling efficient separation of frontend presentation from backend logic.
